

Section 1 Exercise

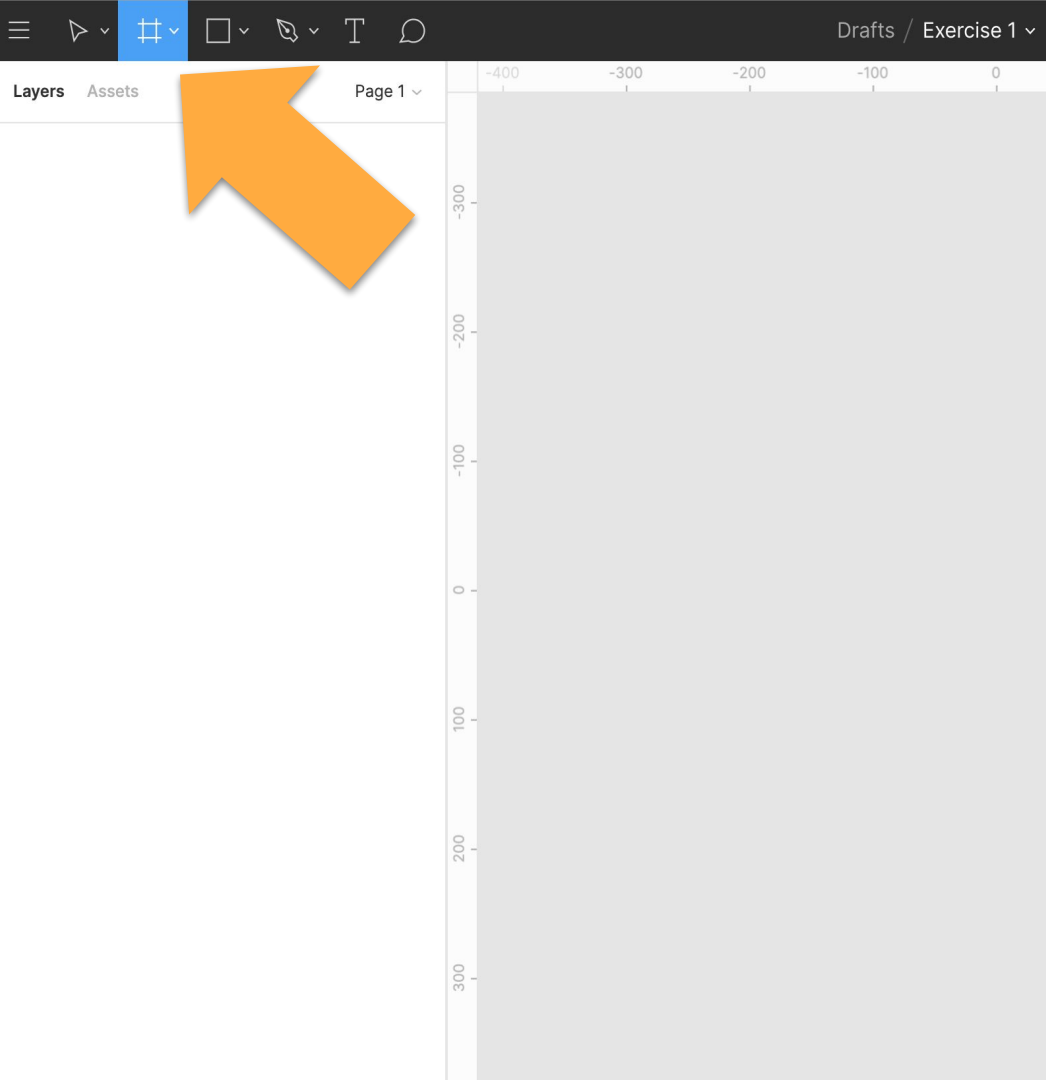

Section 1 Exercise

Visit [Figma.com](https://figma.com) and create a new Figma document by clicking the “New File” button near the upper right hand corner of the interface.

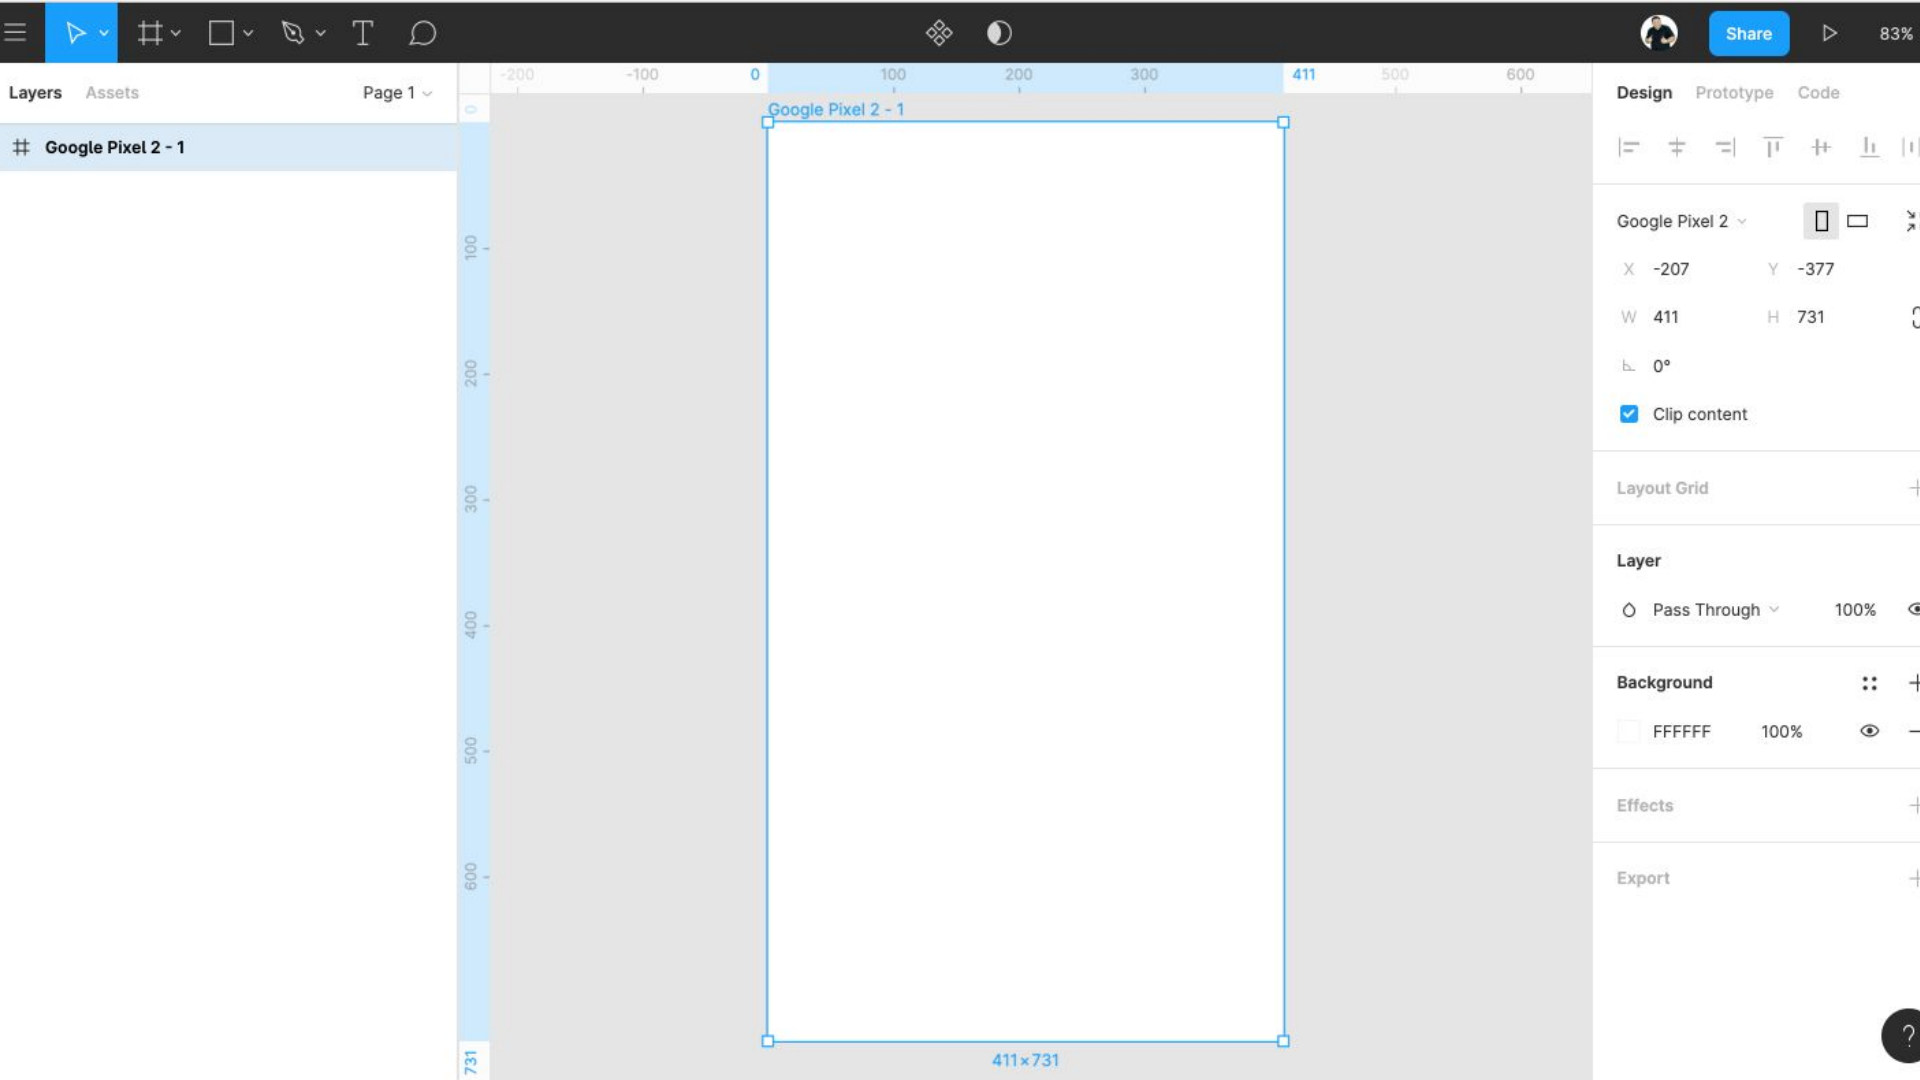

Click where it says “untitled” and rename your file “Exercise 1”.

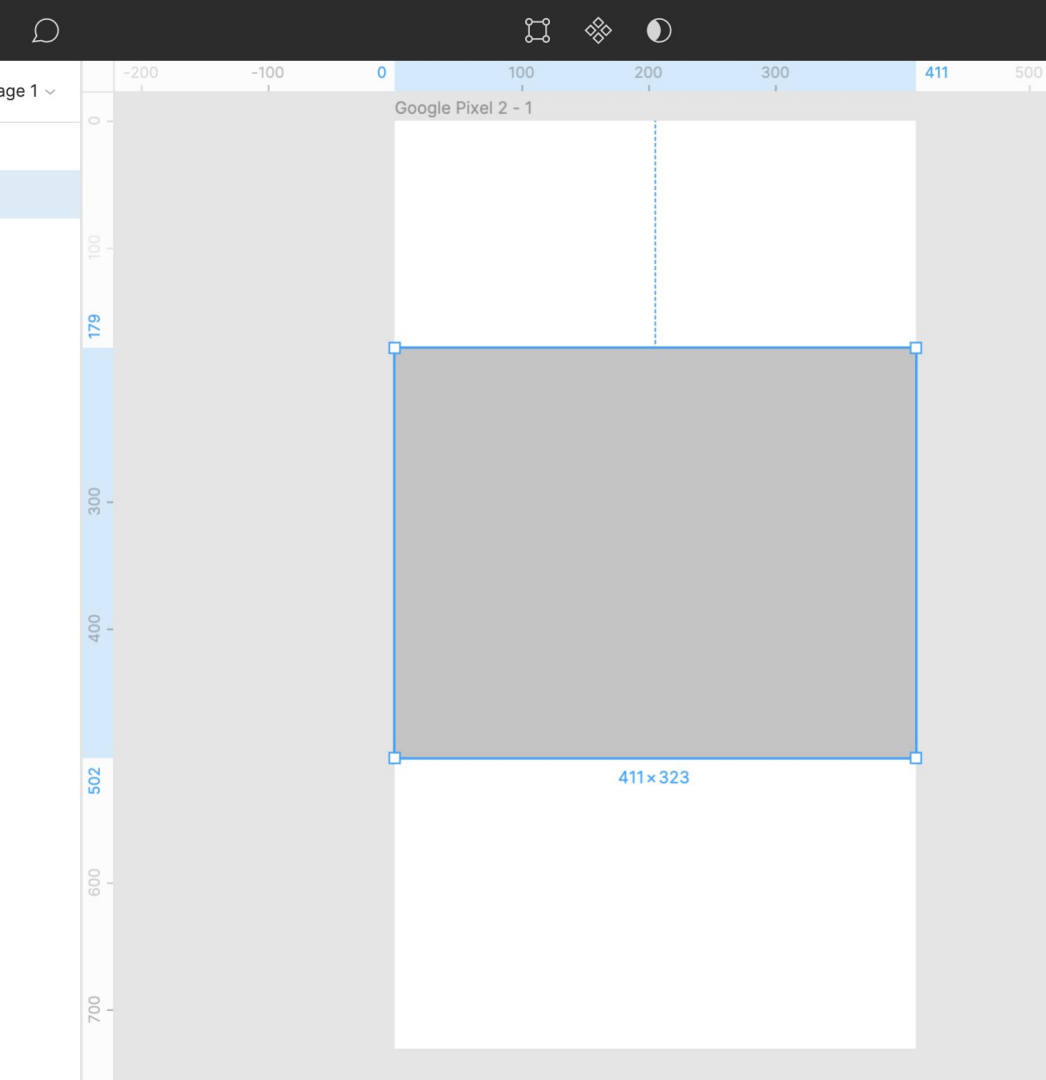

Click on the Frame tool in the row of tools at the top of the interface. The Frame tool looks like a hash sign (#).

From the list of frames that appear on the right hand side of the interface choose these Google Pixel 2.

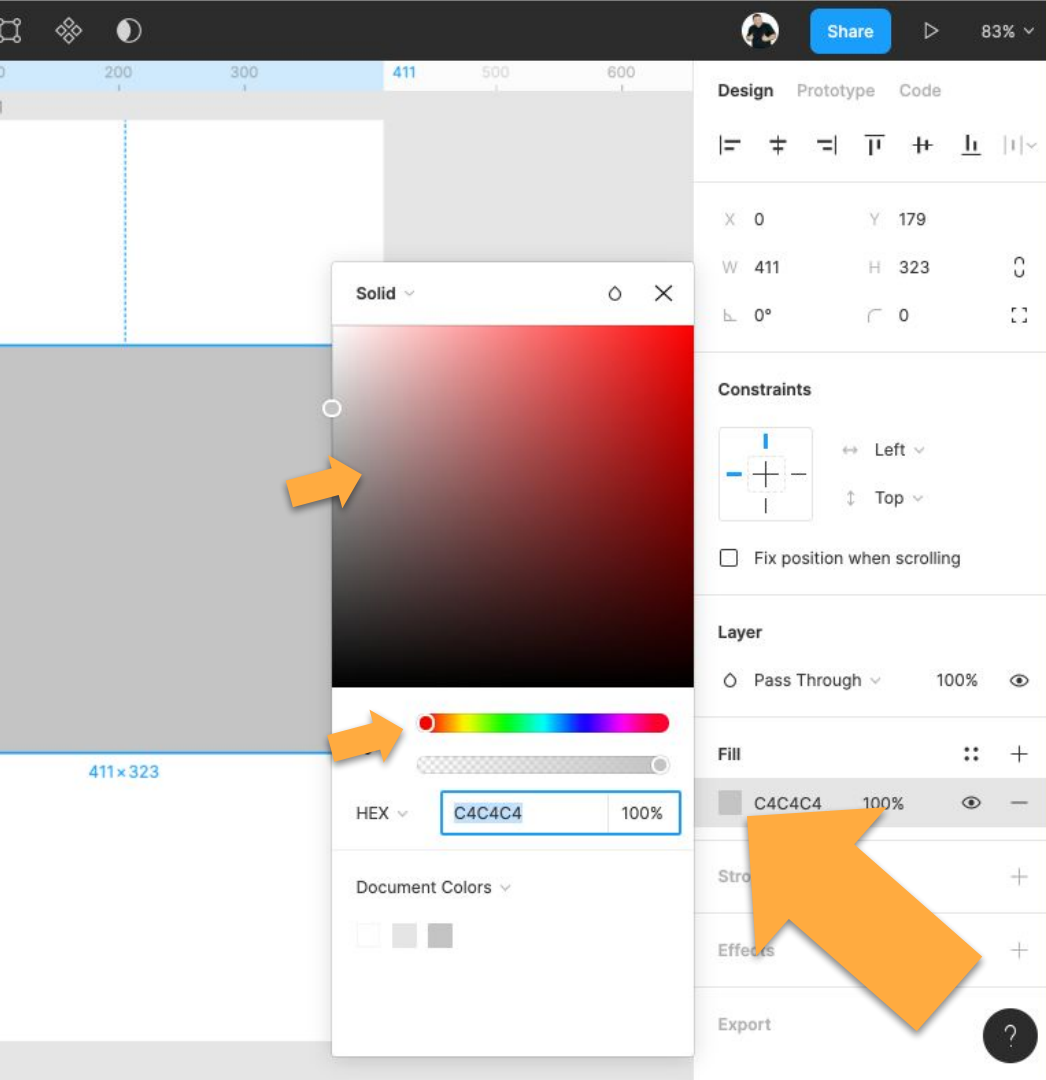

The frame of the Google Pixel 2 will appear.

Using the rectangle tool, create a rectangle that is about $\frac{1}{3}$ of the way from the top of the interface, $\frac{1}{3}$ of the way from the bottom and reaches all the way across.

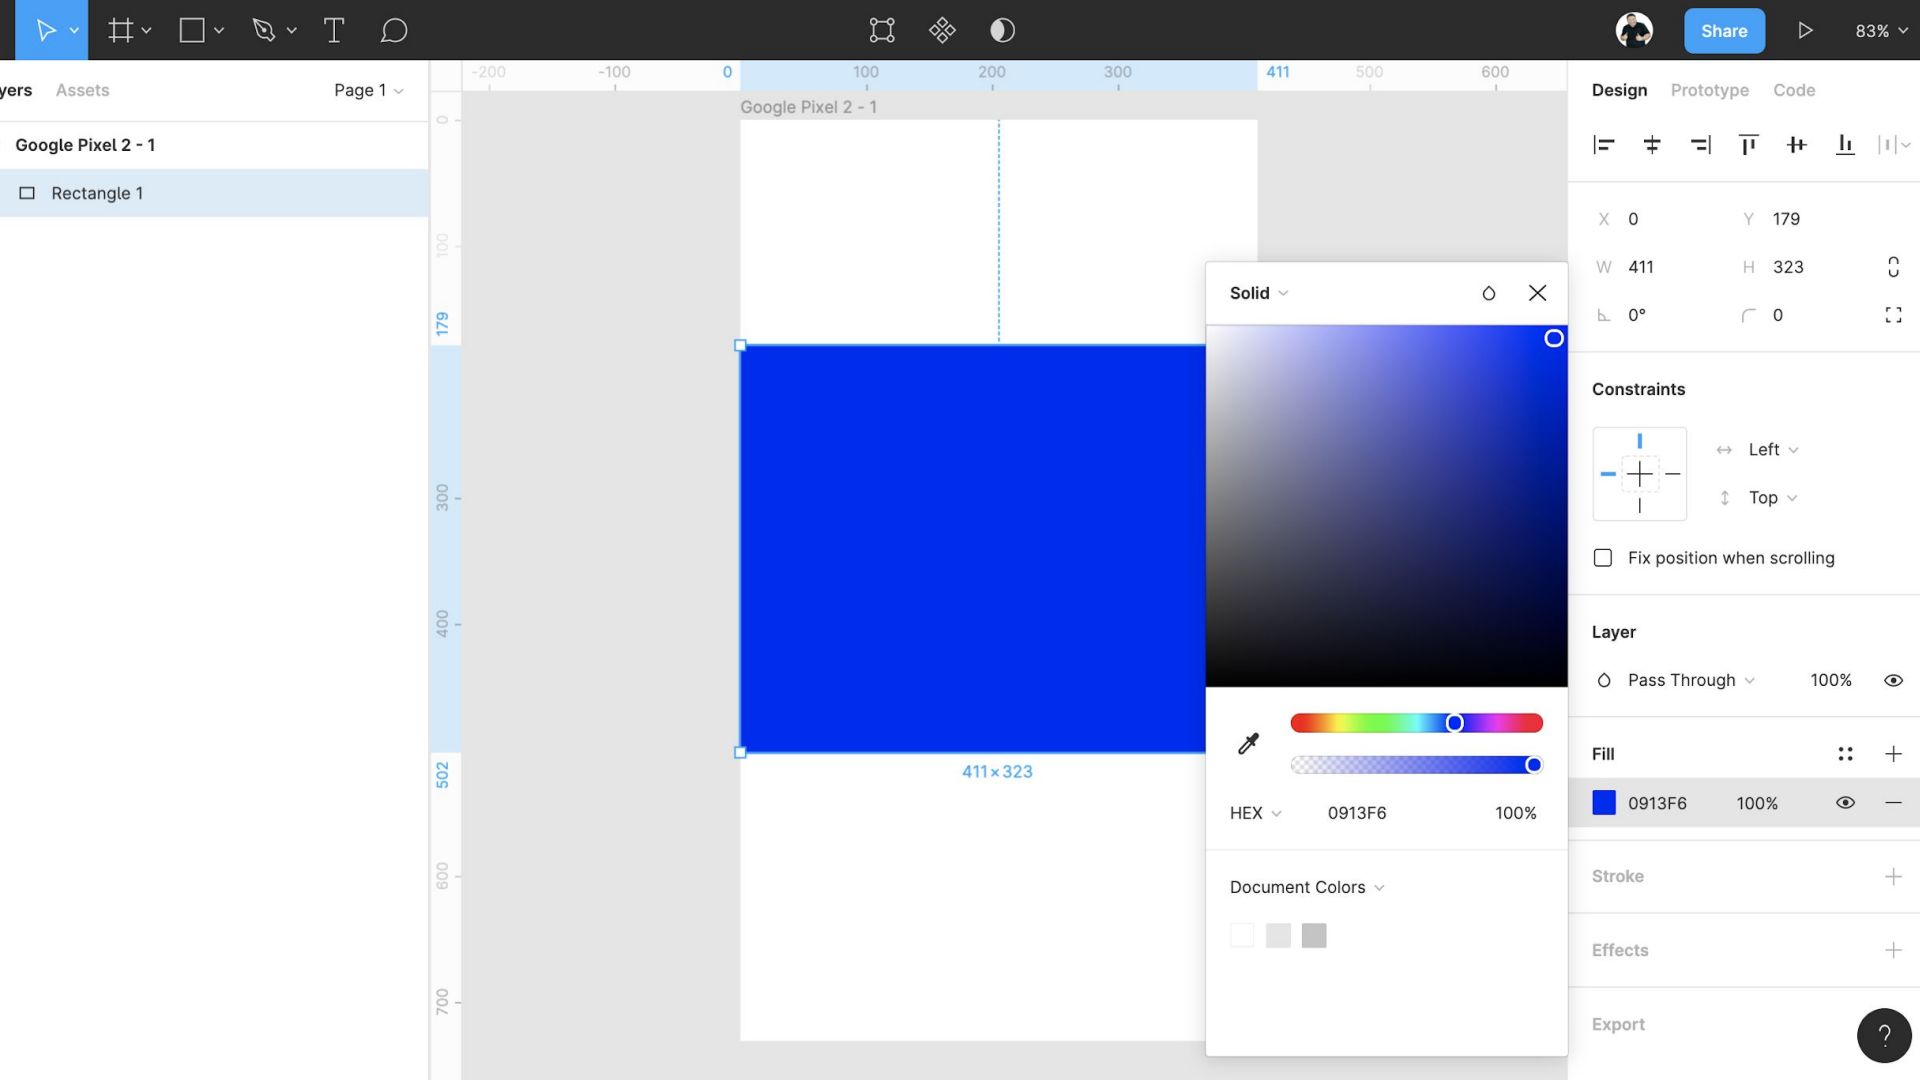

Use the screenshot on the left as a guide to approximate the size of your rectangle.

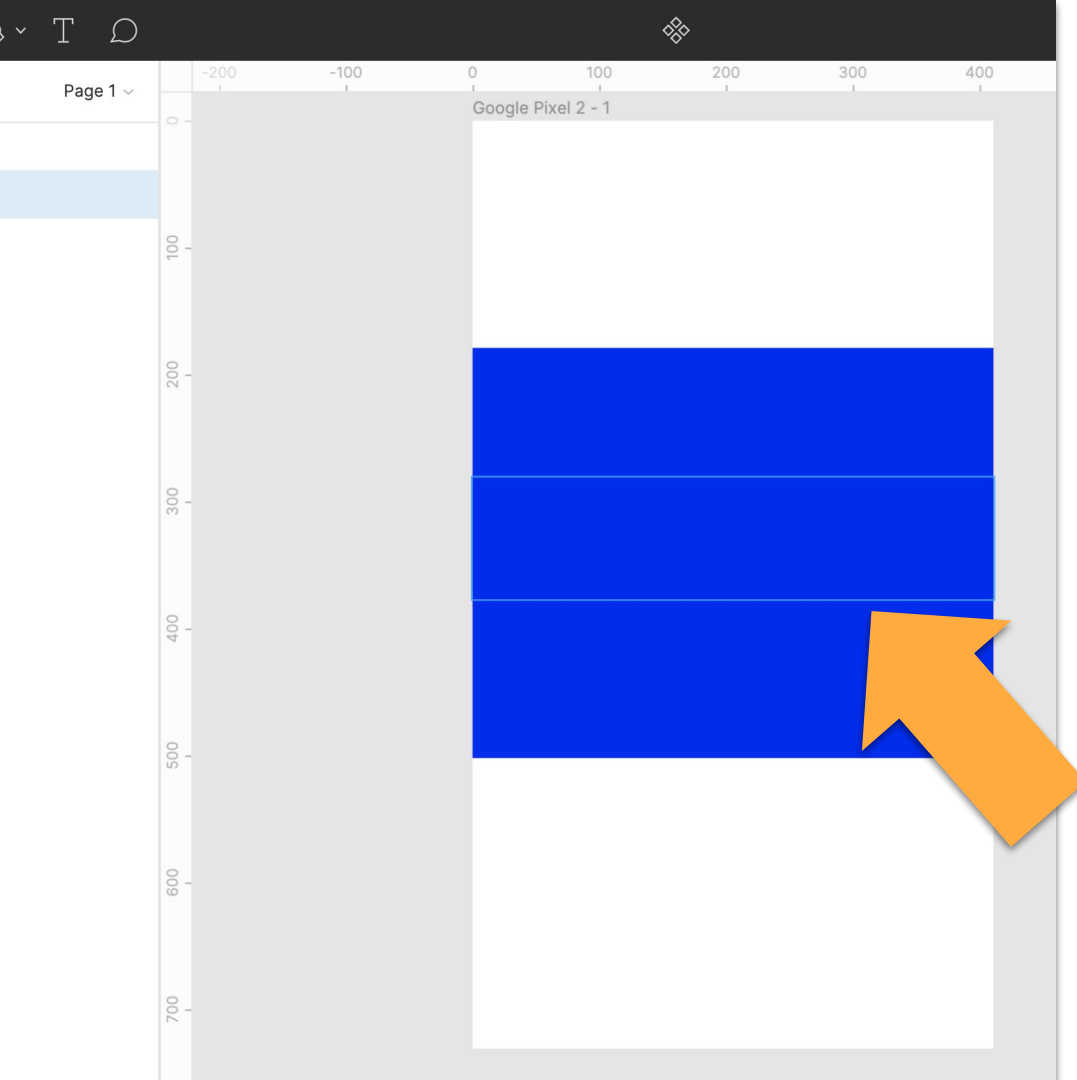

Making sure the rectangle is selected (click on it if it's not), click the fill control from the context-sensitive properties panel on the right hand side of the screen.

Drag the color control that looks like a rainbow to select a general hue. Then use the circle selector towards the top of the control to select an exact color.

The rectangle you drew in the interface should reflect the fill color you have chose.

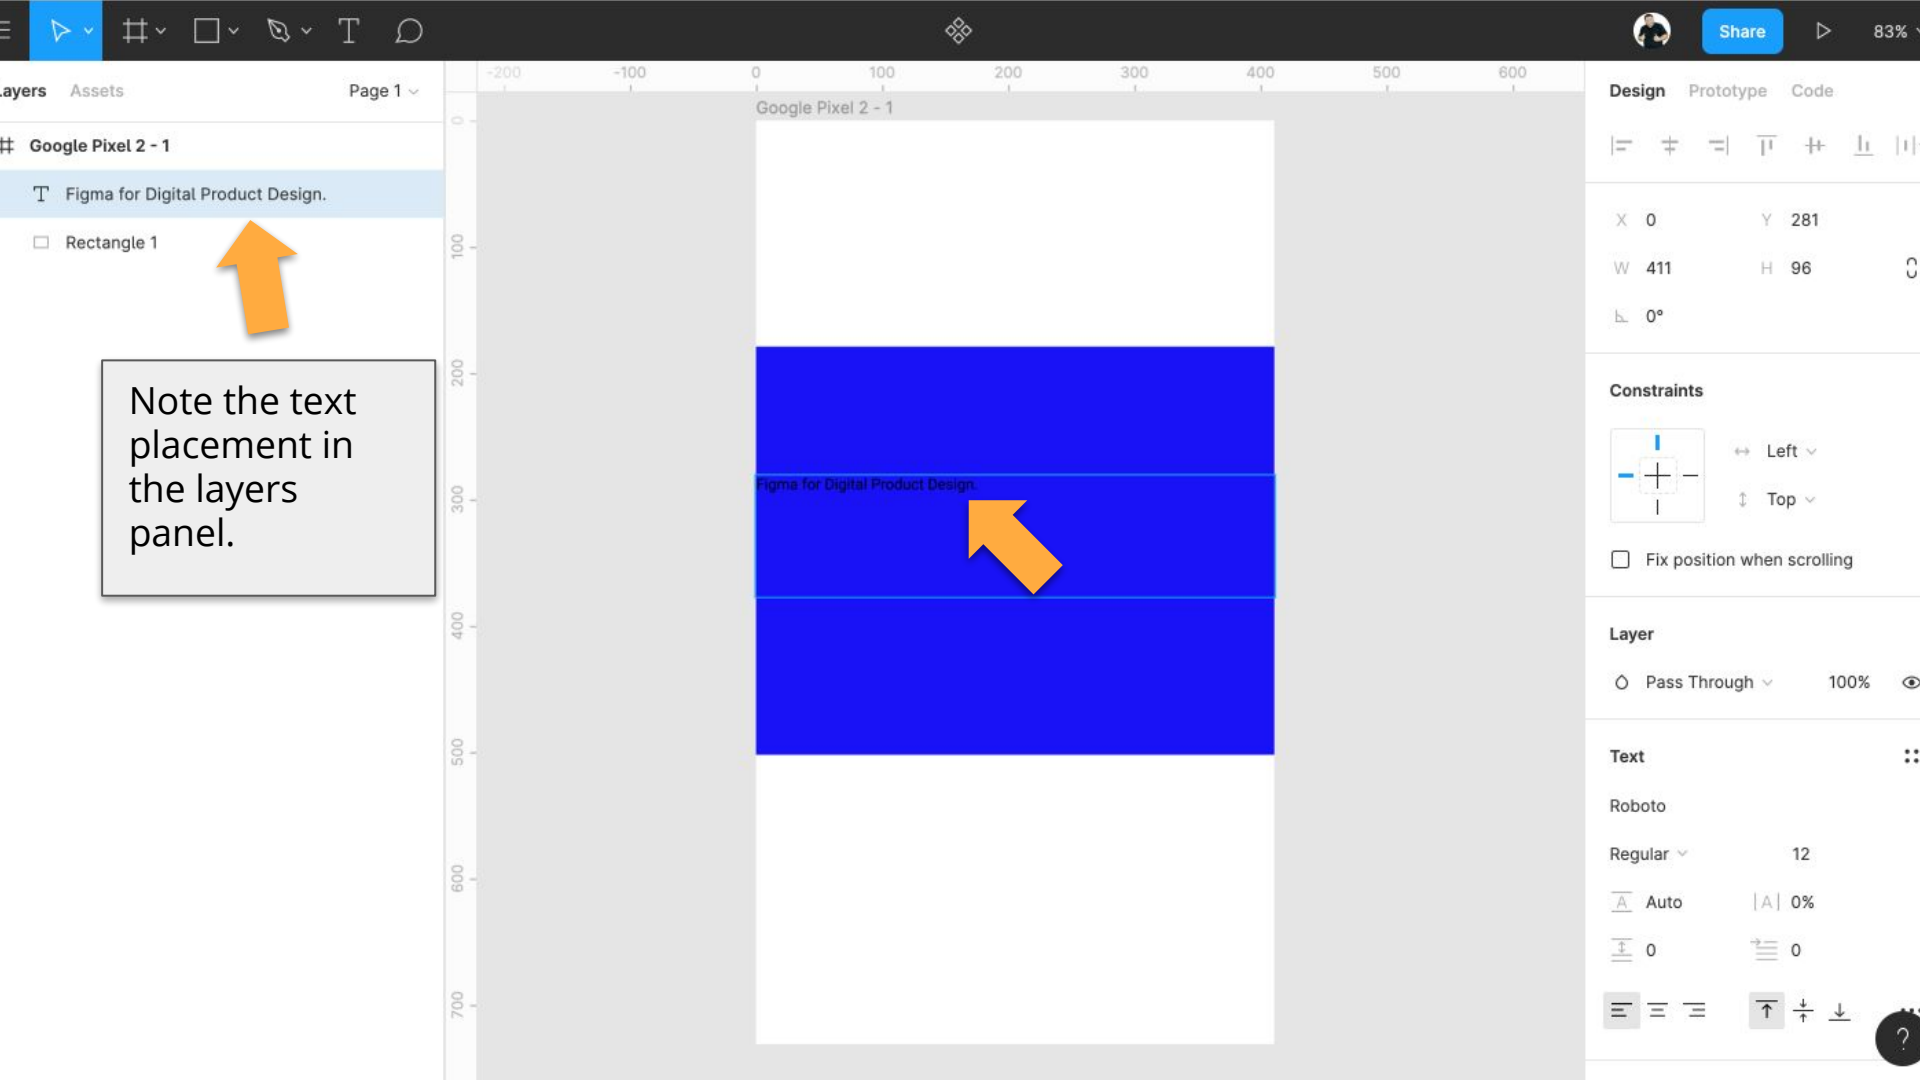

Next, select the text tool which looks like a capital 'T'.

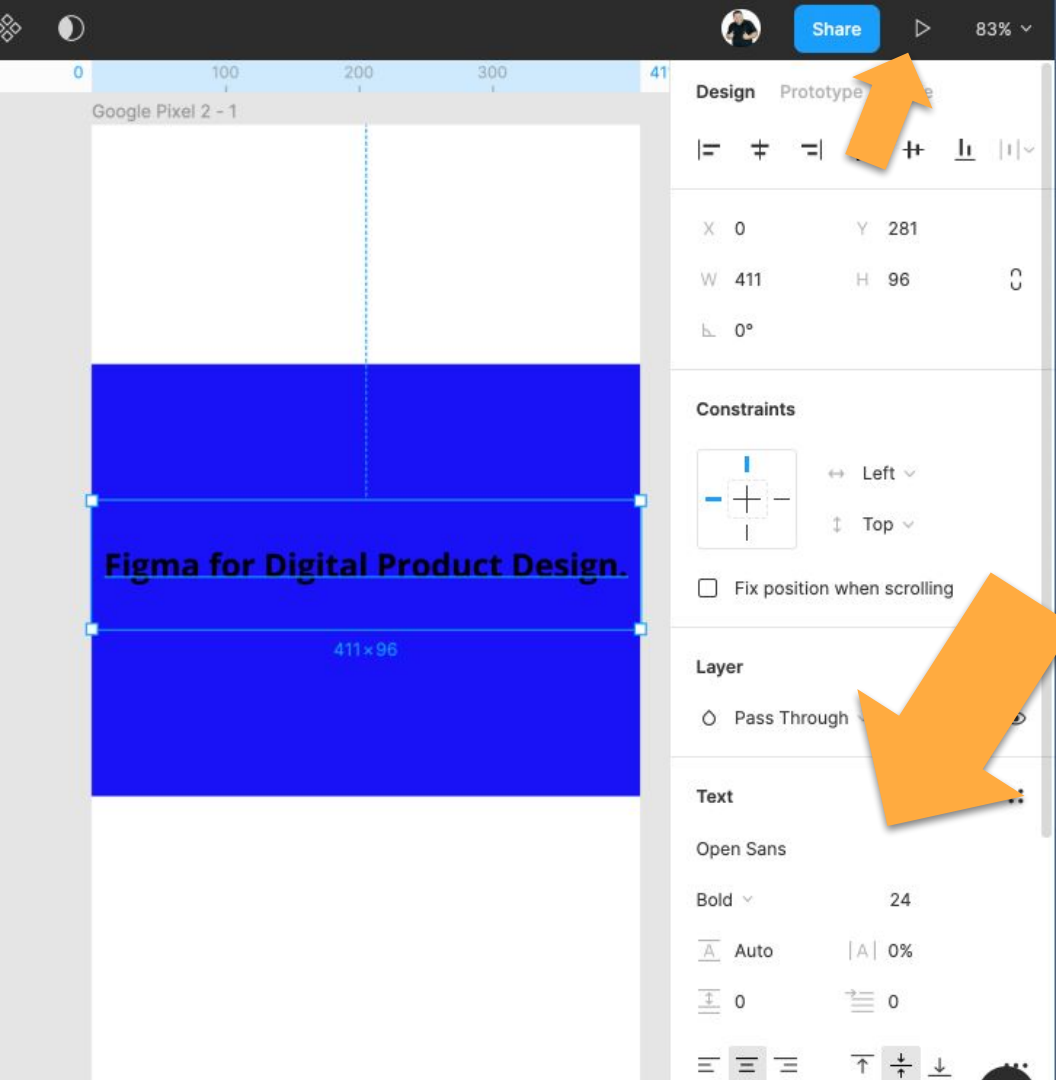

With the text tool drag a rectangle across the center of the larger rectangle you drew initially.

This is where the text will when you begin typing.

Type the course name in the box, "Figma for Digital Product Design."

Note the text placement in the layers panel.

Double click on the text so it is selected. Using the text options in the properties panel select a typeface, size and align the text to the center. Adjust the position of your text so it's centered from top to bottom.

Click the present button on the top right hand side of the interface to see your final design.

Congratulations! You have produced a mobile prototype for the title screen for this course.

Feel free to continue to edit, experiment and make changes.
